Latihan 1

```
const Latihan_3_2 = () => {
  const PersonalData = {
    name: "Anton Sukamto",
    nim: "20200101",
    address: "Jl. Rangga Gading, No.01, Bogor",
    email: "anton.sukamto@ibik.ac.id",
    phone_number: "081234567890",
    age: 21,
    isStudent: true,
    skills: ["React Native", "Java", "Networking"],
  };
```

(memodifikasi data personal dengan menambahkan data age (Number), isStudent (Boolean), dan skills (Array))

Latihan 3

```
app > module > Tugas_3.jsx > ...
import React from "react";
import {
  Image,
  StyleSheet,
  Text,
  TextInput,
  TouchableOpacity,
  View,
  ScrollView,
  ImageBackground,
} from "react-native";
```

(menambahkan scrollview dan imagebackground agar bisa menampillkan foto pada background form dan memastikan jika konten terlalu panjang, user bisa menggeser layarnya ke bawah)

```python
import {
    Image,
    ImageBackground,
    ScrollView,
    StyleSheet,
    Text,
    TextInput,
    TouchableOpacity,
    View,
} from "react-native";

const Latihan_3_2 = () => {
  const PersonalData = {
    name: "Anton Sukamto",
    nim: "20200101",
    address: "Jl. Rangga Gading, No.01, Bogor",
    email: "anton.sukamto@ibik.ac.id",
    phone_number: "081234567890",
    age: 21,
    isStudent: true,
    skills: ["React Native", "Java", "Networking"],
  };

  return (
    <ScrollView contentContainerStyle={styles.scrollContainer}>
      <ImageBackground
        source={{ uri: 'https://images.unsplash.com/photo-1557683316-973673baf926' }}
